PROFESSIONAL SUMMARY

Full Stack Web Developer with experience designing, implementing, and maintaining production business-critical web applications and database systems in Linux environments. Skilled in PHP, Python, SQL, and JavaScript, with hands-on experience integrating APIs, automating operational workflows, and supporting ERP systems. Experienced in managing relational databases, maintaining high-traffic e-commerce platforms, and producing clear technical documentation. Known for collaborating with stakeholders to improve system usability and mentoring junior developers while delivering stable, maintainable solutions.

TECHNICAL SKILLS

Programming Languages	PHP, C/C++, C#, JavaScript, Python, Java, Visual Basic, SQL, R.
Web Technologies	HTML5, CSS3, REST APIs, JSON, XML, Tailwind CSS.
Frameworks and Platforms	Laravel, PrestaShop, WordPress, React, Next.js.
Databases & Data Management	MySQL, MariaDB, Microsoft Access, HSQLDB, SQL Query Optimization, Schema Design.
Systems & Tools	Linux, Apache, Git, Bitbucket, Jira, DigitalOcean, LiquidWeb, Veeam, Microsoft Active Directory, VMware ESXi.
Application Development & Support	Application Design, System Integration, Production Support, Technical Documentation, Automation Scripting, ERP System Maintenance, Database Administration, User Support & Troubleshooting.

WORK EXPERIENCE

CNF Marketing Inc. – *Full Stack Web Developer* *Jul 2024 – Present*

- Maintain and customize business applications and e-commerce systems built with PHP, Python, and SQL, ensuring reliability, security, and performance.
- Design, implement and update application features using PHP, JavaScript, HTML, and CSS to meet business needs.
- Manage Linux servers, including Apache configuration, performance monitoring, and security.
- Monitor system performance and troubleshoot application issues to maintain stability and reliability of production systems.
- Design and maintain MySQL, MariaDB, and Microsoft Access databases, optimizing queries and handling data migrations.
- Maintain and enhance a legacy ERP system in Visual Basic, modifying forms, queries, and business logic.
- Integrate ERP systems with external services via APIs (payment, shipping, product feeds).
- Write automation scripts in Python and PHP to streamline repetitive tasks.
- Provide technical support for hardware and software systems, troubleshooting issues and assisting users with application and infrastructure problems.
- Conduct user testing and collaborate with stakeholders to improve system usability.
- Mentored and supervised a junior developer (co-op student), assigning development tasks, reviewing code, and providing technical guidance.
- Maintain technical documentation to support system maintenance and internal knowledge sharing.

PROJECTS & PUBLICATIONS

MR.VIPER – *Introduction to Data Mining (Research Publication)*

Published in Proceedings of the International Conference on Big Data Analytics and Knowledge Discovery (DaWaK 2023), Springer Lecture Notes in Computer Science.

- Co-authored peer-reviewed research on mining minimal rare itemsets from sparse datasets.

- Modified the VIPER vertical mining algorithm using bitwise optimization techniques to improve computational efficiency.
- Implemented and evaluated the algorithm in Java on benchmark datasets.
- Publication indexed in Springer LNCS and ACM Digital Library.

FAT-32 Reader – *Systems Programming*

- Developed a C program to retrieve files from FAT-32 drives, demonstrating proficiency in file system parsing and low-level operating system concepts.

Reversible Learning – *Software Engineering*

- An android application that can be used to make user customized flashcards for the purposes of studying individually.
- Developed as a collaborative effort with a group of individuals supporting the principles of Software Development Life Cycle (SDLC).
- Created with Android Studio, HSQLDB. Written in Java and SQL, using Test-Driven Development (TDD), with 3 layered testing architecture (Unit, Integration and Acceptance), coming to an overall 94% test coverage.

Personal Portfolio – *Web Application*

- Developed a responsive portfolio website to showcase technical skills and projects.
- Imprlemnted light/dark mode and interactive animations to enhance user experience.
- Ensured the website was fully responsive, across a wide range of devices, from desktop to mobile.
- Written in JavaScript, TypeScript, HTML. Utilized Next.js to create dynamic and interactive content, React to build reusable components and Tailwind CSS for efficient and consistent styling.

EDUCATION

University of Manitoba – *Bachelor of Science, Major: Computer Science, Minor: Statistics* *2018 – 2024*

Relevant Coursework Data Structures, Algorithms, Operating Systems, Databases, Software Engineering, Technical Documentation, Statistical Modeling.
